Overview

The Marketing Overview Page gives you a high-level view of how your marketing campaigns are performing.

How to Find the Marketing Overview Page

This page is found in portal through the left-side menu under the Marketing Insights module.

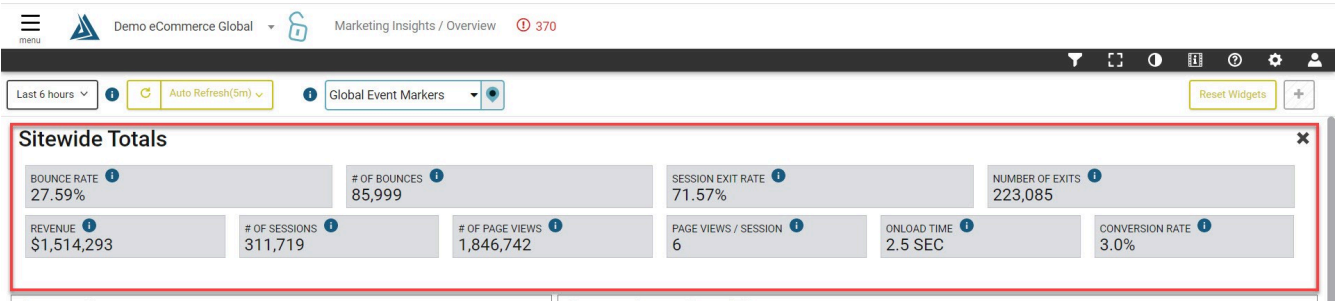

Widgets

The Marketing Overview Page is essentially a customizable dashboard with preset widgets.

Sitewide Totals

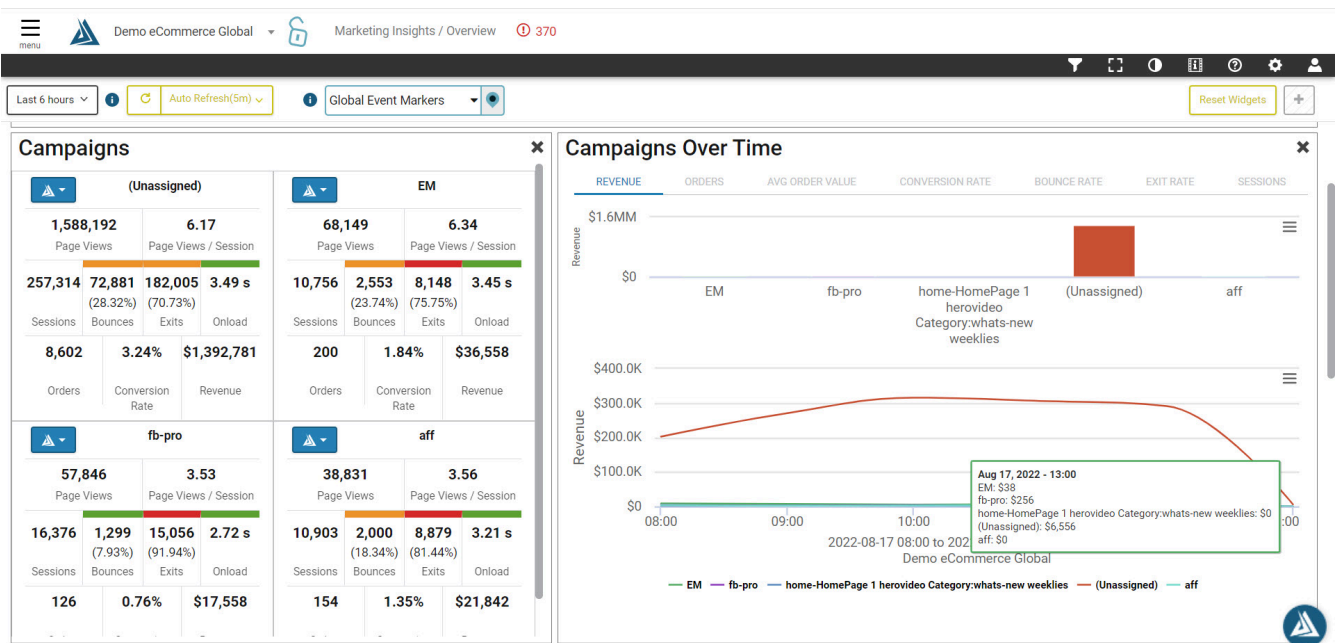

The top widget breaks down your site-wide totals for the major metrics, including Bounce Rate and Page views.

Campaigns

The widget below on the left fills in with your top 4 campaigns. It determines the top 4 campaigns by traffic volume.

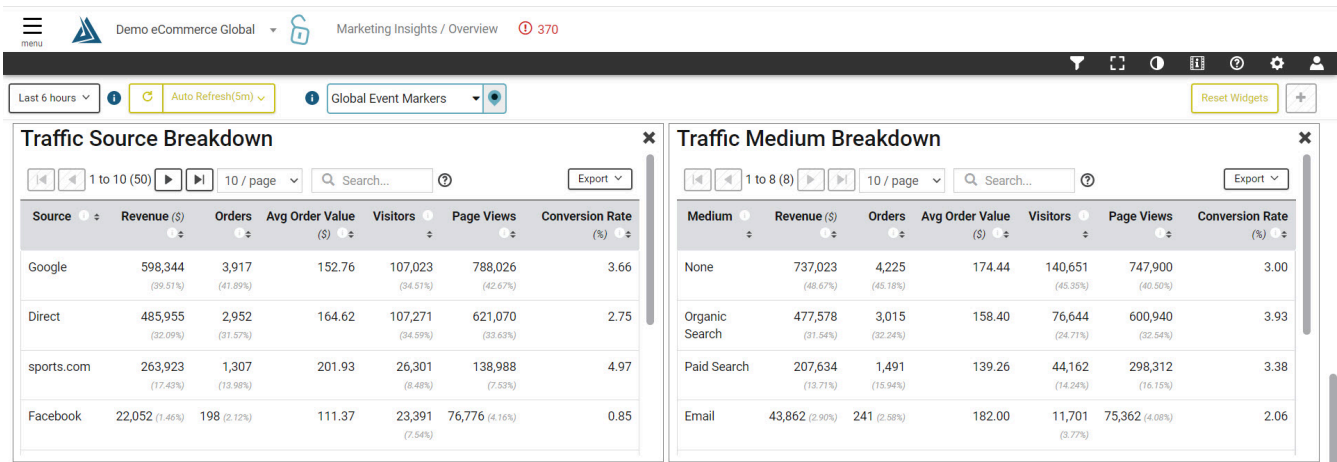

To the right is the campaigns over time widget. This shows you a bar graph with the total numbers for each campaign over the time period, and below shows you the same in a line graph. Each line represents each of your top campaigns.

By default you will see the graphs showing revenue. To change the metric, select from the tabs at the top of the widget.

Traffic Source and Traffic Medium Breakdown

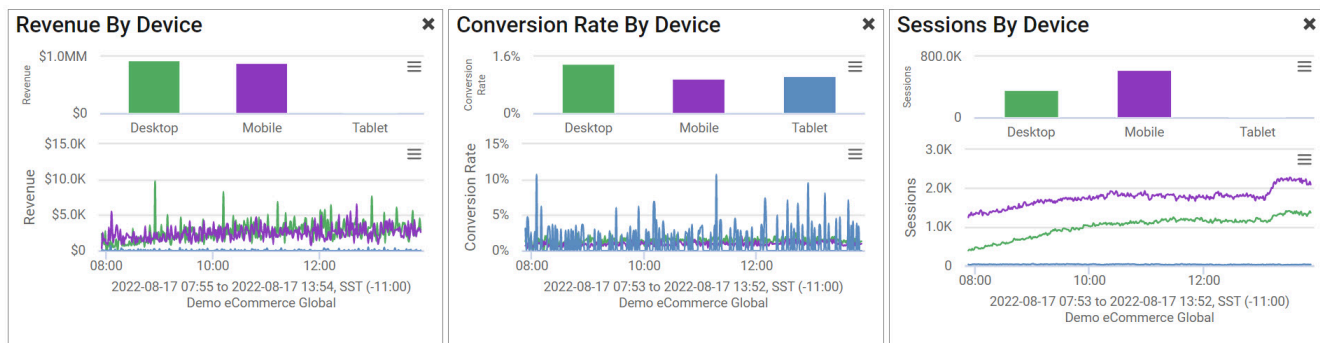

These shows you how each traffic source and traffic medium is performing over the time period.

Click **Export** in the right of each table to save the data.

Device Type Graphs

At the bottom of the dashboard we have 3 widgets that show you revenue, conversion rate and sessions by device – Desktop, Mobile and table.

You'll see the totals in a bar graph above and the trend over time in a line graph below. Note the colors of the bars correspond to the device that you'll see trended in the line graph.

How to Filter the Marketing Overview Page

To change the time period, use the selector in the top left of the dashboard.

You can filter down the data to exactly what you need by using the filter options. Click the filter icon in the top right, make your selections and click apply filters to update the dashboard.

The screenshot displays the Marketing Overview Page interface. At the top, there's a navigation bar with 'Demo eCommerce Global' and 'Marketing Insights / Overview'. Below this, a toolbar includes a date selector (set to 'Last 6 hours'), an 'Auto Refresh(5m)' button, and a 'Global Event Markers' dropdown. A red box highlights the date selection menu, showing options from 'Last 1 hour' to 'Last 90 days'. To the right, the 'Editing All Widgets' panel is open, showing various filter categories like 'Time Period', 'Marketing', 'Traffic Source / Referrer', 'Traffic Medium', 'Campaign Name', 'A/B Testing Segment', and 'Visitor Type'. The main content area features a 'Campaigns' table with columns for Page Views, Sessions, Bounces, Exits, and Onload, and a 'Campaigns Over Time' chart showing revenue trends for different campaigns like 'EM', 'fb-pro', and 'home-Homero'. A red box also highlights the 'x' icon in the top right of the 'Campaigns' widget, which is used to hide the widget.

How to Customize the Marketing Overview Page

Lastly, you can customize your view in this dashboard by clicking the x icon in the top right of any widget. This will hide the widget from the view, and place it to the side.

You can hide the side panel by clicking the minus icon above.

This screenshot is identical to the one above, showing the Marketing Overview Page with the same interface elements and red boxes highlighting the date filter and the 'Editing All Widgets' panel. It demonstrates the customization options available in the dashboard.

To show hidden widgets, simply click the plus icon, then click and drag the widget back into the dashboard view.

Also, to revert the page to the default view, click the button in the top right "Reset Widgets."
