Widget Overview

The DEO Anomalies and Site Opportunity Widget is viewable on the DEO homepage.

This widget is made up of machine learning that is constantly monitoring your site for issues, known as our anomaly detection.

When it detects an issue, it will automatically move that issue to the top of the widget and prioritize it by Severity (Critical, Significant, Normal, or Minor) and create a card in the issue tracker.

Severity	Status	Date Detected	Issue	Module
Critical	Active	Feb 27 12:57 AM	Synthetic Anomaly Detected in Domain Duration for the domain typekit.net	Synthetic Monitoring
Minor	Active	Feb 27 08:57 AM	Synthetic Anomaly Detected in Domain Duration for the domain alphabroder.ca	Synthetic Monitoring
Minor	Clear	Feb 27 07:58 AM	Synthetic Anomaly Detected in Domain Duration for the domain typekit.net	Synthetic Monitoring
Minor	Clear	Feb 27 06:57 AM	Synthetic Anomaly Detected in Domain Duration for the domain ip-api.com	Synthetic Monitoring
Minor	Clear	Feb 27 05:57 AM	Synthetic Anomaly Detected in Domain Duration for the domain cloudflare.com	Synthetic Monitoring
Minor	Clear	Feb 27 04:58 AM	Synthetic Anomaly Detected in Domain Duration for the domain cloudflare.com	Synthetic Monitoring
Critical	Clear	Feb 27 01:57 AM	Synthetic Anomaly Detected in Domain Duration for the domain licdn.com	Synthetic Monitoring

If you want further information on the issue, you can click on the down carrot, and an expanded view will show what the issue description was.

Severity	Status	Date Detected	Issue	Module
 Critical	Active	Feb 27 12:57 AM	Synthetic Anomaly Detected in Domain Duration for the domain typekit.net	Synthetic Monitoring
Actions A percent change of -93.8% was detected for the domain typekit.net on the page Alphabroder - Express Order . This determination was based on the previous hour average of 59 ms compared to the baseline average of 944 ms .				
	Minor	Active	Feb 27 08:57 AM	Synthetic Anomaly Detected in Domain Duration for the domain alphabroder.ca

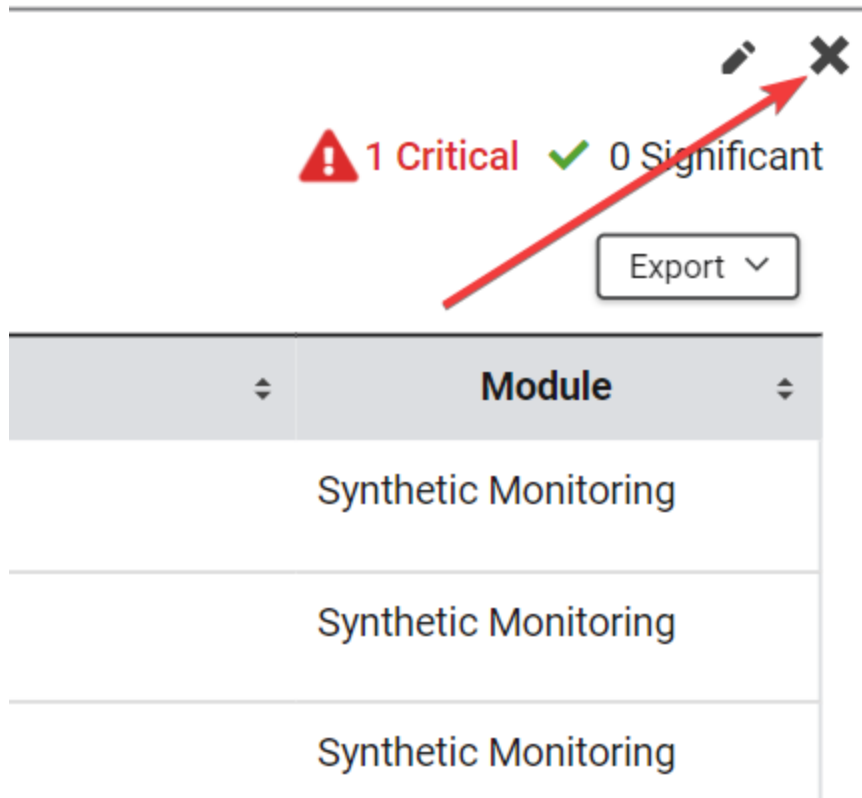

If you click Actions -> View Details, it will link you to the location in the portal with data for the given issue. For example, if a slowdown was detected for a particular domain, this would take you to the Domain Details page.

If you perceive the issue as not important or perhaps it's already fixed, you can archive or dismiss the issue within the Actions menu.

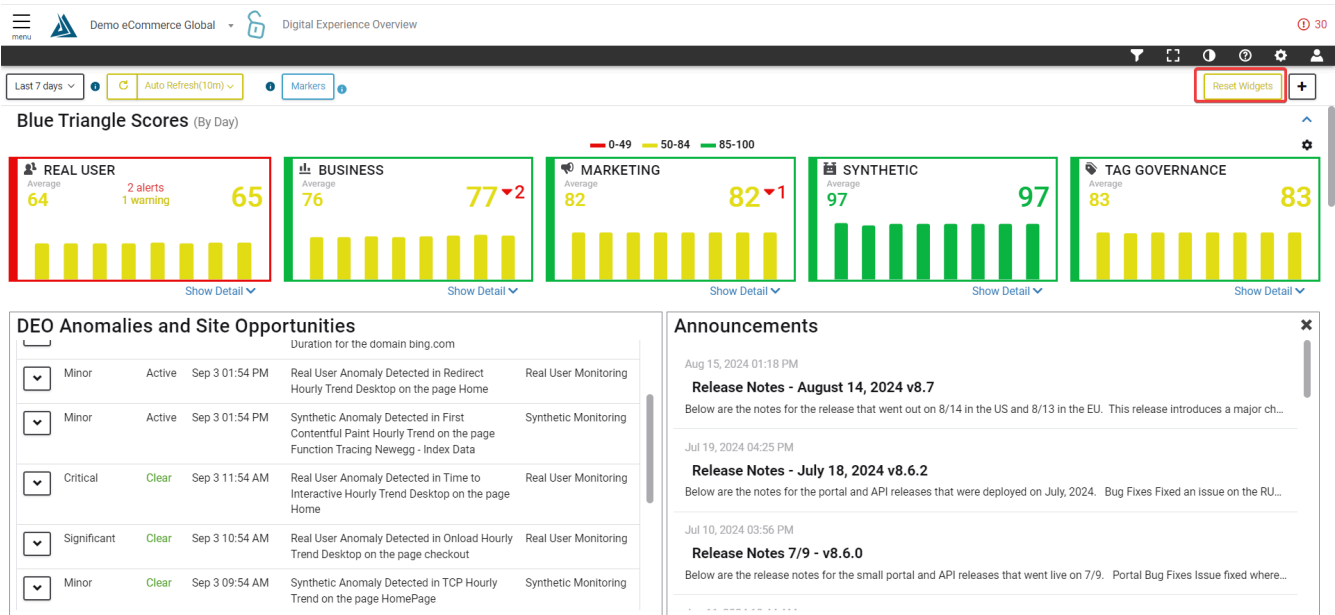

The screenshot shows the widget interface with a table of issues. The first issue is 'Critical' and 'Active', detected on Feb 27 12:57 AM. The description states: 'A percent change of **-93.8%** was detected for the domain typekit.net on the page **Alphabroder - Express Order**. This determination was based on the **previous hour average of 59 ms** compared to the **baseline average of 944 ms**.' The 'Actions' button is highlighted, and a dropdown menu is open, showing options: 'View Details' (with an external link icon), 'Move to Issue Tracker', 'Dismiss', 'Archive', and 'Clear'.

Organizing DEO Page

There are only two stationary widgets on the DEO page: Blue Triangle Scores and the DEO Anomalies and Site Opportunities widgets. You can move any other widget by dragging them around to customize your view. You can also hide any other widget by clicking the X button in the top right.

Lastly, you can reset the dashboard to the BT default view by clicking the Reset Widgets button in the top right.
