Overview

The Environment widget gives you a holistic view of your Tag Governance data in real time.

The look-back period for the graphs is set according to the Dashboard Time Period.

Each item in the widget shows a spark line graph with the starting number to the left, and the delta and percent change to the right.

Domains RUM - The number of distinct domains observed loading on the site with real user data.

Pages RUM - The number of distinct pages observed with real user data.

Files RUM - The number of distinct file names observed loading on the site with real user data.

Domains Synth - The number of distinct domains observed loading on the site with synthetic data.

Pages Synth - The number of distinct pages measured with synthetic data.

Files Synth - The number of distinct file names observed loading on the site with real user data.

Vendors with Profiles - The number of vendors on the site that have profiles in Blue Triangle.
