Introduction

This dashboard offers an overview of the key CWV values on a monthly basis for each page in the defined set. In this report, each CWV metric is trended over time for each page separately.

Example:

Dashboard Components

Monthly CWV Per Page Metrics

In each metric chart, each page is trended. The timespan bucketing depends on the selection of the total report timespan.

In the table, the metric is provided per page on a monthly basis.

The CWV coloring indicates Google's definitions for performance thresholds per metric (Poor, Needs Improvement, Good).

Filter Options

- **Time Period:** The period to use for the dashboard. This value can be fixed, however for scheduled dashboard, it is recommended to use "matches a user attribute" and then select "start of the month" or "Start of the week" so that when the dashboard is sent, it includes the period leading to the time the dashboard is created.
- **Bot Traffic:** Defaults to exclude bots
- **Device:** Desktop or Mobile (browser)
- **Origin**
 - RUM Browser: Desktop browsers
 - Native App: Native app views (iOS, Android)
 - Webviews: HTML pages that are rendered inside a mobile application ([Hybrid Application Explainer](#))
- **Page Name:** Page selector
- **Return/New User**
- **Traffic Segment**
- **Page Group**
- **Timezone**
- **Percentile** (applicable only to CWV, default is 75th percentile)
